

Capa First Response CIC

Environmental Policy

Reviewed and Amended: May 2026

Capa First Response CIC recognises the importance of working in ways that are environmentally responsible and sustainable. As an organisation delivering predominantly online services nationally, we are committed to reducing unnecessary environmental impact wherever possible while continuing to provide accessible support to families and professionals.

Our approach includes:

- Delivering the majority of services online to reduce travel and associated carbon emissions for families, staff and professionals.
- Using digital systems, online resources and electronic communication wherever possible to minimise paper use.
- Encouraging remote meetings and training delivery where appropriate.
- Reducing unnecessary printing and promoting electronic storage of documents and resources.
- Considering environmental impact when arranging travel, venues and events.
- Encouraging staff and associates to work in environmentally conscious ways within their roles.

As Capa continues to grow, we remain committed to reviewing our working practices and identifying further opportunities to improve sustainability and reduce environmental impact across the organisation.

Our environmental approach sits alongside our wider commitment to creating safer, healthier and more sustainable futures for children, families and communities.
